

OVERVIEW

The Saleng Tiny13 is an 8-bit, Arduino compatible microcontroller board complete with on board regulator, user friendly 2.54mm headers and built-in LED. It is probably the simplest Arduino compatible board with only 1Kb of flash, 64 bytes RAM, 64 bytes EEPROM, and 5 useable GPIO's. Of the 5 I/O pins available, 3 can be used as analog input pins (ADC), 2 are PWM capable and one pin is an external interrupt pin. The microcontroller has an SPI peripheral accessible from the same GPIO pins. The clock source is selected from any of the internal clock sources: 1.2MHz, 4.8MHz, and 9.6MHz. There are more than one Arduino-core board files that can be used with this board to be able to use it with the Arduino IDE if desired.

Figure 1: Saleng Tiny13

These specifications are more than enough to implement projects that are otherwise overkill/expensive for a standard Arduino board. This board has the same ATtiny processor as its larger variants such as the Attiny85. The processor has throughputs approaching 1 MIPS per MHz.

The simplicity of this board pushes its price down to probably the lowest level yet. With this simpler specifications however, the board requires an ISP programmer, such as the **Kimat Arduino ISP Shield**, Atmel ICE, USPASP, AVRISP, STK500 or the DIY

programmer ArduinoISP, to be able to upload code and set its fuses for clock and other optional settings. The board does not have a hardware UART (“Serial”) but some Arduino cores may support simplified softwareSerial – styled software UART. While a bootloader may be used, it may be impractical as the code size alone has a significant footprint. Hence, we recommend to use this board without bootloader and upload code via ISP port.

FEATURES

- High performance AVR® 8-Bit Microcontroller
- Operating Voltage: 5V
- Low Power Consumption
- Internal 5V, 1A regulator
- Wide Vin - 6-12Vdc
- Builtin LED
- Small Compact Size
- Inexpensive
- Arduino Compatible

PIN FUNCTIONS

Saleng Tiny13 Pins	Function
VIN	Input Power Pin, 6-12V
VCC	5V output
GND	Ground
RST	Reset pin.
D0 / MOSI	Digital pin 0 / MOSI, connected internally to builtin LED “L”
D1 / MISO	Digital pin 1 / MISO
A1 / D2/ SCK /	Analog pin 1 or Digital pin 2/SCK
A2 / D3	Analog pin 2 or Digital pin 3
A3 / D4	Digital & Analog input / output

INSTALLING THE BOARD ON THE ARDUINO IDE

As there are more than one compatible Arduino-core, this document will focus on the the [MicroCore](#). When the core is installed in the Arduino IDE, a new board under the Tools>Board menu shall appear and may be used with the Saleng Tiny13. MicroCore requires Arduino IDE version 1.6.13 or greater. To install via Board Manager, follow these steps. Other installation methods are discussed on the MicroCore repository. This installation is required before the Saleng Tiny13 can be used with the Arduino IDE.

Follow these steps:

- Open the Arduino IDE.
- Open the File > Preferences menu item.

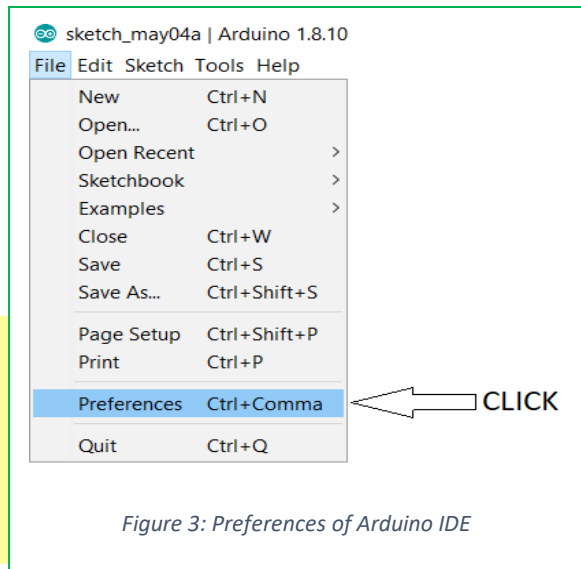

Figure 3: Preferences of Arduino IDE

An IMPORTANT NOTICE: at the end of this guide addresses availability, warranty, changes, use in safety-critical applications, intellectual property matters and other important disclaimers.

- Enter the following URL in Additional Boards Manager URLs:
https://mcudude.github.io/MicroCore/package_MCUdude_MicroCore_index.json

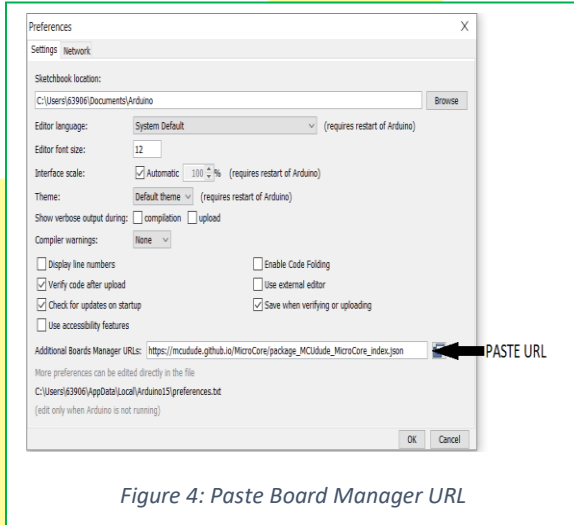

Figure 4: Paste Board Manager URL

- Open the Tools > Board > Boards Manager... menu item.

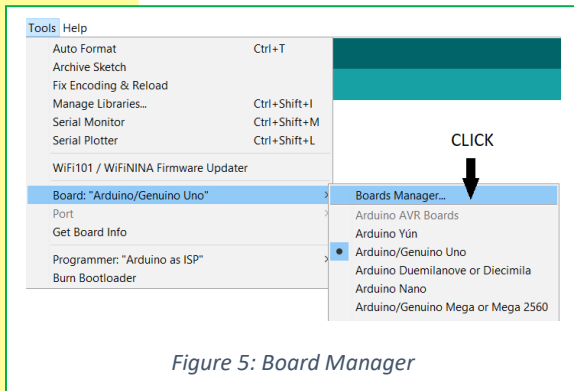

Figure 5: Board Manager

- Wait for the platform indexes to finish downloading.
- Scroll down until you see the MicroCore entry and click on it.
- Click Install.

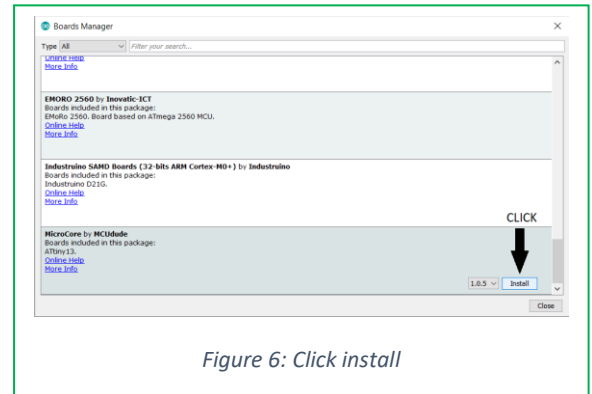

Figure 6: Click install

- After installation is complete close the Boards Manager window.

UPLOADING SKETCHES

Unlike a regular Arduino board such as an Uno that is programmed with a bootloader and has a dedicated USB port, the Saleng Tiny13 is programmed via the ISP port. The procedure for ISP writing the program is the same for all boards with classic AVR, including Arduino Uno/Nano/Mega.

An ISP programmer is required for uploads. While this document will focus on the **Kimat Arduino ISP Shield** as an ISP programmer, others may be use such as the USBASP, Atmel ICE, AVRISP or STK500.

After successful installation of MicroCore , connect the Kimat Arduino ISP shield (and host Uno board) to Saleng Tiny13.

Kimat Arduino ISP shield	Saleng Tiny13
SCK	A1 / SCK / D2
MISO	D1 / MISO
MOSI	D0 / MOSI
RST	RST / A0
GND	GND
VCC	VCC

- Select the ATtiny13 MicroCore board and set the settings as:

```
Board: "ATtiny13"
Processor Version: "ATtiny13a"
Processor Speed: "9.6MHz Internal Oscillator"
Use Bootloader: "No (ISP Programmer Upload)"
Millis, Tone Support: "Millis Available, No Tone"
Millis Accuracy: "Better Or Equal 1.666% Error (Default)"
Print Support: "Bin, Hex, Dec Supported"
Serial Support: "Half Duplex, Read+Write"
Link Time Optimisation: "LTO Enabled"
Brown-out Detection Level: "2.7v"
Override Clock Source: "Default"
Override Frequency: "Default"
```

Figure 8: Board Setting of Saleng Tiny13

- After setting up the board, upload a sketch by using Upload using programmer feature and done.

Sketch	Tools	Help
Verify/Compile	Ctrl+R	
Upload	Ctrl+U	
Upload Using Programmer	Ctrl+Shift+U	
Export compiled Binary	Ctrl+Alt+S	
Show Sketch Folder	Ctrl+K	
Include Library		>
Add File...		

Figure 9: Upload sketch on Saleng Tiny13

APPLICATION NOTES

First Test

Before proceeding make sure that all of the steps above were successfully done. Always check your power supply connection a double 5v power supply connected to the VCC can damage the circuit. The Two Vcc and ground are intended for the components not to Saleng Tiny13.

An IMPORTANT NOTICE: at the end of this guide addresses availability, warranty, changes, use in safety-critical applications, intellectual property matters and other important disclaimers.

Upload a blinking LED sketch to determine if the Arduino Uno is able to upload code on Saleng Tiny13.

CODE:

This example code is in the public domain.

```
http://www.arduino.cc/en/Tutorial/Blink
*/
// the setup function runs once when you press reset or power the board
void setup() {
  // initialize digital pin LED_BUILTIN as an output.
  pinMode(LED_BUILTIN, OUTPUT);
}

// the loop function runs over and over again forever
void loop() {
  digitalWrite(LED_BUILTIN, HIGH); // turn the LED on (HIGH is the voltage level)
  delay(1000); // wait for a second
  digitalWrite(LED_BUILTIN, LOW); // turn the LED off by making the voltage LOW
  delay(1000); // wait for a second
}
```

The L LED should blink if the sketch was successfully uploaded.

IMPORTANT NOTICE

Layad Circuits Electronics Engineering Supplies & Services (Layad Circuits) reserves the right to make corrections, enhancements, improvements and other changes to its products, services and documentations, and to discontinue any product or service. Buyers or clients should obtain the latest relevant information before placing orders and should verify that such information is current and complete. Additional terms may apply to the use or sale of Layad Circuits products and services.

Reproduction of significant portions of Layad Circuits information in Layad Circuits datasheets or user guides is permissible only if reproduction is without alteration, displays the Layad Circuits logo and is accompanied by all associated warranties, conditions, limitations, and notices. Layad Circuits is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of Layad Circuits products or services with statements different from or beyond the parameters stated by Layad Circuits for that product or service voids all express and any implied warranties for the associated Layad Circuits product or service. Layad Circuits is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate Layad Circuits products (collectively, "Designers") understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all Layad Circuits products used in or for Designers' applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include Layad Circuits products, Designer will thoroughly test such applications and the functionality of such Layad Circuits products as used in such applications. Layad Circuits' provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "Layad Circuits Resources") are intended to assist designers who are developing applications that incorporate Layad Circuits products; by downloading, accessing or using Layad Circuits Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer's company) agrees to use any particular Layad Circuits Resource solely for this purpose and subject to the terms of this Notice.

Layad Circuits' provision of Layad Circuits Resources does not expand or otherwise alter Layad Circuits' applicable published warranties or warranty disclaimers for Layad Circuits products, and no additional obligations or liabilities arise from Layad Circuits providing such Layad Circuits Resources.

Layad Circuits reserves the right to make corrections, enhancements, improvements and other changes to its Layad Circuits Resources. Layad

Circuits has not conducted any testing other than that specifically described in the published documentation for a particular Layad Circuits Resource.

NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER LAYAD CIRCUITS INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF LAYAD CIRCUITS OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which Layad Circuits products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of Layad Circuits Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from Layad Circuits under the patents or other intellectual property of Layad Circuits. LAYAD CIRCUITS RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. LAYAD CIRCUITS DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. LAYAD CIRCUITS SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN LAYAD CIRCUITS RESOURCES OR OTHERWISE. IN NO EVENT SHALL LAYAD CIRCUITS BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF LAYAD CIRCUITS RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER LAYAD CIRCUITS HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Unless Layad Circuits has explicitly designated an individual product as meeting the requirements of a particular industry standard, Layad Circuits is not responsible for any failure to meet such industry standard requirements. Where Layad Circuits specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may NOT use any Layad Circuits products in life-critical applications. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers' own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection. Designer will fully indemnify Layad Circuits and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer's noncompliance with the terms and provisions of this Notice.
